Professional Summary

Full Stack Software Engineer with hands-on experience building **web and AI-powered** applications using React.js, Next.js, Python, Django, Node.js, REST APIs, and PostgreSQL. **Meta Certified Full Stack Developer** with a strong foundation in modern frontend, backend, **database design**, and **API development**. Experienced in delivering end-to-end, **role-based systems** and **AI-integrated** e-commerce solutions with a focus on scalable architecture, maintainability, and user experience.

Technical Skills

Languages: JavaScript (ES6+), Python, SQL, HTML5, CSS3, Java

Frontend: React.js, Next.js, Tailwind CSS, React Hooks, State Management, Responsive Web Design

Backend & Databases: Django, Node.js, Express.js, PHP, REST APIs, PostgreSQL, MySQL

Engineering & Tools: Git, GitHub, Vercel, OOP, CRUD Operations, API Integration, Role-Based Access Control (RBAC)

Experience

Full Stack Developer Intern | LogXpert

Aug 2026 – Present

React.js, Node.js, Express.js, PostgreSQL
GitHub

- Developed a farm management system using React, Node.js/Express, and PostgreSQL, connecting animal registration and worker management interfaces to backend data operations.
- Implemented **role-based access control** for stakeholder roles: owner, administrator, veterinarian, manager, and investor etc **with permissions governing access** to system functions.
- Built dashboards **tracking per-animal** yield, cost, and status to support farm productivity and **expense monitoring**.

Frontend Developer Intern | DevelopersHub.co (Remote)

Feb 2025 – Apr 2025

- Built a five-page React e-commerce frontend with reusable components and responsive layouts for mobile, tablet, and desktop screens.
- Resolved cross-device layout issues and reduced unnecessary component re-renders; incorporated code reviews and design feedback while collaborating with a remote team.

Selected Projects

AI Commerce & Customer Support Agent

Next.js

- Built a Next.js shopping and support agent designed for Shopify integration, combining voice-to-voice interaction, **image-based product discovery**, **size suggestions**, and in-chat product navigation.
- Implemented a **custom-order workflow: capture requirements**, obtain confirmation, **generate an AI product preview for approval image**, calculate customization pricing, and create an order.
- Created unlisted catalog entries for **custom products with in-chat Add to Cart** and View Details actions; **automated email alerts** when requested products return to stock.

E-Commerce Web Application

JavaScript, PHP, MySQL | 2025

- Developed product listings and a shopping cart with JavaScript-driven add, remove, and quantity updates without page reloads.
- Designed a **relational MySQL schema** for product and order data and connected frontend interactions to PHP backend operations; used semantic HTML and accessible UI patterns.

AI Voice Assistant

Python, Speech Recognition, REST APIs | 2024

- Built a **voice-driven** desktop assistant integrating **weather**, **news**, and **search services with application launching**, **document conversion**, and AI-assisted **text generation**.

Education

Bachelor of Science in Software Engineering

2023 – Present

Riphah International University, Sahiwal, Pakistan

Relevant Coursework: Data Structures, Object-Oriented Programming, Database Systems, Web Engineering, AI

Certifications & Awards

Meta Full Stack Developer: Front-End & Back-End from Scratch	Sep 2026
Coursera specialization; 10 courses covering React, JavaScript, Python, Django, databases, APIs, and version control.	
Student of the Year Award – Riphah International University	2023 – 2024
