PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building scalable web, desktop, and AI-powered applications using React.js, Next.js, JavaScript (ES6+), and Python. Demonstrated ability to deliver production-ready projects with a focus on clean architecture, component reusability, and responsive design. Experienced working in remote team environments with strong communication, code review, and iterative development practices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Java, Python

Frameworks & Libraries: React.js, Next.js, Tailwind CSS

Concepts: Component-Based Architecture, State Management, REST API Integration, Responsive Design, OOP

Tools & Platforms: Git, GitHub, VS Code, Vercel, XAMPP

Backend: MySQL, PHP

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

Feb 2025 – Apr 2025

DevelopersHub.co (Remote) | React.js, JavaScript

- Built a 5-page e-commerce frontend from scratch using React.js, organizing the codebase into modular, reusable components that reduced redundant UI code by approximately 10%.
- Resolved cross-device layout breakpoints during QA, delivering consistent rendering across mobile, tablet, and desktop viewports before the project deadline.
- Improved UI responsiveness by auditing and eliminating unnecessary component re-renders, resulting in a smoother user experience.
- Collaborated with a remote team through code reviews and iterative feedback cycles, consistently aligning deliverables with design specifications throughout the development lifecycle.

PROJECTS

React Admin Dashboard

2025

| React.js, Tailwind CSS, JavaScript

- Architected a fully responsive admin interface using a reusable component library — cards, data tables, and sidebar navigation — ensuring consistent UI patterns across all dashboard views.
- Implemented dynamic state management using React hooks to handle live data updates without full page reloads, simulating real-world dashboard behavior.
- Structured the project with feature-based folder organization, making the codebase modular and easy to extend with new modules.

E-Commerce Web Application

2025

| HTML, CSS, JavaScript, MySQL, PHP

- Developed a product listing and cart system with JavaScript-driven dynamic UI updates — enabling add, remove, and quantity adjustments without page refresh.

- Designed a relational MySQL schema to manage product and order data, connecting frontend interactions to backend operations via PHP.
- Applied semantic HTML and accessible UI patterns, reinforcing core web fundamentals alongside modern JavaScript techniques.

Garments Store Management System

2024

| Java, Java Swing, NetBeans IDE

- Developed a desktop-based garment store management system with a user-friendly Java Swing GUI and a secure authentication module.
- Implemented full CRUD operations for inventory management, enabling efficient product handling, stock updates, and record maintenance.
- Built worker management features including attendance tracking and automated net salary calculation with absence-based deduction logic.
- Integrated customer and vendor modules to track inventory purchases, pending payments, and outstanding balances for financial monitoring.

AI Voice Assistant

2024

| Python, Speech Recognition, REST APIs

- Engineered a real-time AI voice assistant capable of handling natural language voice commands and automating daily desktop tasks.
- Integrated multiple data services including live weather updates, news briefings, Wikipedia lookups, and Google/YouTube search automation.
- Implemented system-level automation including application launching, PC shutdown/restart commands, and Word-to-PDF document conversion.
- Designed an AI-powered text generation module capable of dynamically drafting letters, applications, and professional written content.

Personal Portfolio Website

2025

| React.js, Tailwind CSS, Vercel

- Designed and deployed a production-grade portfolio on Vercel showcasing projects, skills, and contact information as the primary professional web presence.
- Optimized page structure for mobile-first rendering, achieving a clean, consistent layout across all screen sizes without external UI libraries.
- Applied Tailwind CSS utility classes to maintain a cohesive design system, eliminating custom CSS overhead entirely.

EDUCATION

Bachelor of Science in Software Engineering

2023 – Present

Riphah International University, Sahiwal, Pakistan

Relevant Coursework: Data Structures, Object-Oriented Programming, Database Systems, Web Engineering, Software Design & Architecture, Software Quality Assurance

CERTIFICATIONS & AWARDS

-
- Frontend Development Internship Certificate — DevelopersHub.co (2025): Awarded upon successful completion of a remote internship focused on React.js application development in a professional team environment.
 - Student of the Year Award — Riphah International University (2023–2024): Recognized at the university level for outstanding academic performance and sustained contribution to technical coursework and project-based learning.
